my story

An experienced professional who is eager to learn and evolve. I have worked as a graphic designer for more than ten years. Moving to Amsterdam and changing my life motivated me to move forward and seek new professional challenges. After following an intensive training in web development, I completed a five month internship and right after got my first job as a frontend developer working on a React/Typescript project. I am currently seeking for a position where I can contribute to a creative environment while gaining more experience and expanding my knowledge.

education - training

Web Development Intensive : New York Code + Design Academy | Amsterdam | April-October 2017 (240hours)

Frontend: HTML5, Css, Javascript, jQuery, React, Redux.

Backend: Node, Express, Databases, User Authentication.

Other: Command Line, Git, Github, Collaborative Development, CS Basics, MVC, OOP.

Online Training : edX - Codecademy - Code School - Pluralsight | 2017 - present

Coursework: HTML5, CSS3, Javascript, ES6, React, Testing, SQL, Express, Python, Computer Science.

HND in Graphic Design (MBO) : Mediterranean College | Thessaloniki | 2006 - 2008

Desktop Publishing Design (MBO) : IEK Delta | Thessaloniki | 1998 - 2000

web development experience

Junior Front End Developer : Axual | Utrecht | October 2018 - July 2019

- I was a member of the product development team. Worked in KanBan methodology using Jira boards to manage tasks.
- Main focus of my work was implementing new features, maintaining existing ones, bug fixing, testing, refactoring to manage application state using Mobx, deploying and releasing new versions, writing/updating internal and public documentation.
- Collaborated with the backend team when needed on API implementation.
- Performed code reviews of other team members' work.
- Main technologies: React, ES6, Typescript, Sass, Mobx, Cypress, Jest, Git.
- Attended frontend and React conferences and workshops and presented gained knowledge to my colleagues.

Intern Front End Developer : Stamkracht | Amsterdam | April - August 2018

- I redesigned the front-end of the main page of the platform with React component based one, following my personal designs (github.com/marouli/side-menu-react).
- Learned agile methodology and worked on ongoing sprints, with Jira, as a part of a team, for a complex Angular 1.6 application. With no prior knowledge of Angular, I managed to find my way in a large code base, debug issues and complete tickets.

Personal project: a Node.js database driven app managing theater shows in Amsterdam filtering on language. Next steps are writing web crawlers and retrieving real time data. This app is live on url: <http://iamtheater.nl>

graphic design

For several years, I was managing a printing store and was responsible for the whole workflow lifecycle, which involved communicating with clients, designing, producing and delivering the final product. In result, I have gained valuable skills that will always follow me along in my future steps. Working under pressure, multitasking, patience, decision making, emotional management, taking responsibility and taking criticism are just a few. In other positions, I had the opportunity to collaborate in a team, share ideas, being open and understanding and finding the way to enjoy and have fun, even under the most pressuring circumstance.
